## Say it with stamps! The new 2-in-1 stamp markers

Where would we be without our much-loved icons? The new stamp markers with cute icons from a smiley to a heart haven't been made for us though, but for the little ones. As they like to copy us adults, they are sure to love these new painting utensils: They feature an extra-wide fibre tip on one side, enabling generous hatching, too. On the other side, there is a stamp tip for creative design and decoration. This combination is sure to bring lots of fun and joy painting! The pens are available now in cardboard boxes of either five or ten brilliant colours.
