

Leave your mark! WRITink made of plastic with finger print

Thumbs up for the new writing instruments from the WRITink range: the fountain pen, rollerball pen and ballpoint pen create a unique writing experience thanks to the tangible finger print on the grip. We like!

The WRITink is perfect for pupils looking to impress in class with strikingly coloured pens with a cool design. Since it also offers an exceptionally comfortable writing performance, it is sure to become the new favourite companion for homework!

All WRITink models are available in the classic colours black and white as well as trend colours pink and blue. The cap and grip are made of plastic and are available in black or white. The fountain pen features a black stainless steel nib. People preferring a more ordinary writing instrument can choose between the rollerball pen and the ballpoint pen with a particularly smooth-gliding XB refill – which is especially practical for people writing fast and a lot.

Fountain pen (M,F,B): EUR 19.95
Rollerball pen: EUR 17.95
Retractable ballpoint pen: EUR 9.95
